

# HEIMDALL - SBOM SCANNING & GENERATION

Heimdall's vulnerability management tool enables automatic generation of a Software Bill of Materials (SBOM), identifies known & exploitable vulnerabilities, and enables prioritized risk reduction in an easy, economical, and reliable way.

## SHIFT IMPACTING MEDICAL DEVICE MANUFACTURERS (MDMs)

Buyers of medical devices now demand transparency into the software included in connected devices. Today, by utilizing Med-Crypt's healthcare-specific tools, leading MDM's can rapidly determine the impact of known vulnerabilities on devices and provide this visibility into new and legacy devices to meet regulatory and customer security requirements.

## COVERAGE

By running on a representative device (i.e. not on every device), our tools generate an SBOM with depth across the following technologies:

### WINDOWS

### LINUX

COVERAGE

- WINDOWS 7 & 10

- DEBIAN BASED LINUX DISTRIBUTIONS

FEATURES

- SCAN OS TO DETECT OS VERSION AND PATCHES
- SCAN WINDOWS REGISTRIES FOR INSTALLED PROGRAMS

- DETECT DEPENDENCIES USING OS'S PACKAGE MANAGER
